

Growing Up in Roman Britain: answers

Year 4 · 12 marks. Accept any sensible answer that is backed up by the text.

1. London. (1 mark)

Finding information (2b). A fact stated in the first section: children practise finding it quickly.

2. About seven. (1 mark)

Finding information (2b). Retrieval from the “School days” section.

3. Wooden tablets covered in wax (accept “wax tablets”). (1 mark)

Finding information (2b). The answer is a short phrase in the text, so the child must copy it accurately.

4. stylus (1 mark)

Word meaning (2a). Practises finding a specific word that matches a description.

5. Mistakes could be smoothed away and the pupil could start again. (2 marks)

Explaining from the text. The child explains a reason from the text in their own words, which goes a step beyond copying.

6. Girls and children from poorer families. (2 marks)

Finding information (2b). The child pulls two pieces of information together from one sentence.

7. Their families needed the help or the money, so children had to work instead of staying at school or playing all day. (2 marks)

Inference (2d). The text gives two facts but never joins them. The child has to work out the link, which is what inference means.

8. Any supported difference, for example: many children did not go to school (“Not every child went to school”); they wrote on wax tablets with a stylus; they played with knucklebones; wealthy homes had a hypocaust. (2 marks)

Inference (2d). The child makes a comparison with their own life and backs it up with a detail, a step towards inference.
