

# How Do Bees Make Honey?: answers

Grade 4 · 14 points. Accept any sensible answer that is backed up by the text.

**1. A sweet liquid inside flowers.** (1 point)

Finding information (RI.4.1). A key term defined at the start of the text.

**2. In its honey stomach.** (1 point)

Finding information (RI.4.1). Finding where something is stored, stated directly in the text.

**3. The water dries up or goes into the air, because the nectar gets thicker as it leaves.** (2 points)

Word meaning (RI.4.4). The word is never defined. The child works out the meaning from what happens to the nectar.

**4. The moving air helps the water dry out of the nectar so it becomes thick like honey.** (2 points)

Inference (RI.4.1). The text says what the bees do and what happens next. The child joins the two to explain why.

**5. Thick honey with less water will not spill or spoil as easily, so it can stay safe for a long time.** (2 points)

Inference (RI.4.1). A reasoned guess that uses the clue in the text.

**6. In winter the bees cannot find nectar, so they need the stored honey for food.** (2 points)

Inference (RI.4.1). Working out the reason behind a fact that the text states but does not explain.

**7. 1. A bee collects nectar from flowers. 2. A worker bee adds enzymes to the nectar. 3. Bees fan their wings over the honeycomb. 4. Bees seal the cells with wax.** (2 points)

Sequencing events. Following a process from start to finish.

**8. One point for saying bees collect nectar and bring it to the hive; one for saying they turn it into thick honey by adding enzymes and drying it, then seal it in wax.** (2 points)

Summarizing (RI.4.2). Pulling the main idea out of four sections.
